SEARCH REQUEST FORM

Scientific and Technical Information Center

Requester's Full Name Jerome Grant Examiner #: 46553 Date: 8/11/05
Art Unit: 2624 Phone Number _____ Serial Number: 101059398
Location: NY 9839 Results Format Preferred (circle): PAPER DISK E-MAIL

If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elec species or structures; keywords, synonyms, acronyms; and registry numbers; and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: _____

Inventors (please provide full names): _____

Earliest Priority Filing Date: _____

**For Sequence Searches Only* Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.*

STG - (A) United States patent
AB - In a communicating apparatus, telephone or directory application software can be
automatically initiated in a personal computer. An off-hook detecting unit of the
apparatus continuously makes a check to determine whether or not an external
telephone is set to an off-hook state. If this is the case, the off-hook detecting unit
sends off-hook information via a serial interface to the computer. An application
initiation request unit of the computer monitors the serial interface. Having
recognized an off-hook state of telephone in accordance with the off-hook
information, the request unit automatically initiates the directory application
software.
